# **REPORT OF THE RESEARCH WEEK- 2022**

**"To show-case the research amongst the  
students and faculty members of the  
constituent colleges"**

## Introduction:

The objective of the research week is to share the research and its impact to the society amongst the students and faculty members of the CVM University.

Since many years, the Engineering and Technology colleges of the Charutar Vidya Mandal have been organizing project fairs for undergraduate students. The purpose of project fair was to present the project work to the expert evaluator. During the project fair, the fellow students were invited for open discussion. Such fair helped students in sharing their research ideas, through improved presentation skills. For the Post graduate students, the poster presentation was arranged at the time of the final examination of the dissertation. The poster presentation was open for all faculty members and UG/PG students. Based on the history of sharing the research work to different community, the idea of the Research Week-2022 was initiated.

Dr. P. M. Udani, Director General of the CVM University had proposed Research Week for First batch of Ph. D students during the month of December, Moto of organising the research week is to show-case the research of the PhD Scholars amongst the students and faculty members of the constituent colleges.

## Objectives:

The main objectives of the Research Week-2022 are as follows:

- 1) To improve the understanding of the scientific concepts of the research.
- 2) To help the PhD Students in explaining their research work through poster presentation.
- 3) To prepare the PhD Students for delivering an oral presentation of their research work.
- 4) To guide the PhD Students for paper presentation.

Research propels humanity forward which is fueled by curiosity in response to observing Nature and natural phenomena: We get curious, ask questions, and immerse ourselves in discovering the mysteries of Nature. Zeal driven by curiosity and necessity led to mimic nature and innovate ideas, concepts, tools, processes and products which improved the quality of our living. The process of generating knowledge and developing processes and products for human benefit involves understanding of basic ideas, principles and concepts while initially tools enabled better understanding of natural phenomena but later improved our survival and lifestyle. As this process led to enormous growth of knowledge which progressed into art, science and technology disciplines.

Teaching and learning have become integral part of our society transforming not only our lifestyle but also the nature itself. Our modern society considers the process of knowledge

generation and innovation at the highest level of formal education in terms of Doctoral degree in academic institutions. Universities have been playing a major role in the expansion of frontiers of knowledge and creating disruptive technologies. Thus, the progress of the University depends on the research activity. Additionally, it is imperative that the research activity needs to cater towards nurturing and mentoring of young students towards developing frontiers of knowledge and innovative technologies.

## Research Week 2022

In order to promote the research work of the PhD Students, the poster presentation was planned as an open platform for different community of the constituent colleges. Since the research at University has been started only 2 years ago, the Doctoral students presenting their research topic, its significance and possible outcome to the society is very much important. This year, the Research Week is proposed to be in terms of Poster presentations and in the coming years it can progress in to symposia and conference. Through oral presentation, researchers will share their research ideas and findings to the expert members as well as to the community at a large. The Research and Development cell has organised a Research week during the 16/12/22 to 28/12/22. The detailed schedule of the Research week is attached in Annexure-I. The brief summary of the poster presentation is shown in following Tables 1 and 2.

\*Due to some unavoidable issues, the scholar has submitted the poster but could not able present.

Total 125 PhD Students of Batch-1 (January-2021) have presented their research work in the form of a poster presentation during the Research week-2022.

Around 16 research works were found *Excellent* which can be further converted into the product design or possible application to CVMUISC.

Sample Feedback from the participants are listed below:

Specific comments received during the feedback collection are listed below:

- I am satisfied
- મારાં ટોપિક મા મને વધુ જ્ઞાન આપ્યું અને તેમને આ ટોપિક બવજ સારો લાગ્યો
- It's good experience
- It was a new initiative
- Event was greatly organized and we have gain good knowledge from the panel members.
- It helps us for next RPC.
- Acquired knowledge regarding research topic
- It was very good experience.
- Good Experience
- Explored more details in the sub area
- Research week help me to prepare poster for PhD work.
- The panel was really patience while listening to my presentation and they also gave proper remarks and suggestions related to my topic.

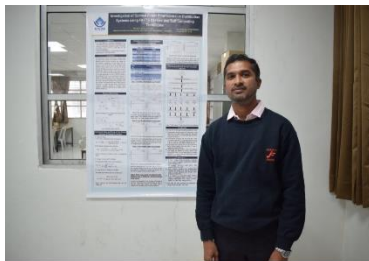

**Its good experience**

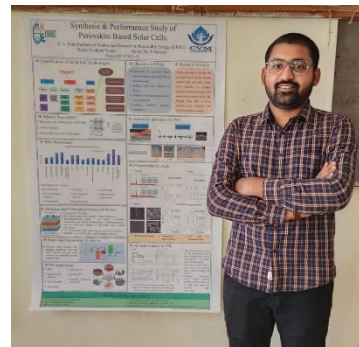

**Explored more details in the sub area**

**Nice and remembrance experience**

**It was a new initiative**

## Looking forward:

The successful execution of the Research Week-2022 has opened up many doors towards the improvement of the research and its importance for the society. Such interactions will create the opportunities for the improvements of the overall performance of the researchers at the university level. Not only the PhD Students, but also the undergraduate and post graduate students will get networking of researchers in their domain/field of research. The research scholars will be able to present their ideas amongst the expert members during the research review, presentation of the research paper and PhD Defense. The research which has a potential of conversion into the startup /patent may get help in terms of the ideation, product design and patent filling process subsequently.
